Contract number	NDICI CSO/2023/451-580

gy-efficient refurbishment of the housing stock. The CSOs will participate in the analysis of the local programmes and work on concepts in close cooperation with the relevant local and national authorities.

Main target groups

CSOs, housing managers, housing owners' associations (HOAs), builders, planners, energy auditors, local and national authorities responsible for housing, modernisation of buildings and energy efficiency

Expected results

- 300 CSO members increased their knowledge on topics of sustainable housing and energy-efficient refurbishment of MFBs
- Cooperation between CSOs and local and national authorities to improve local housing renovation programmes strengthened
- Concepts of energy-efficient refurbishment of MFBs for the three target cities developed
- A coalition of CSOs working in the housing sector was created and operational

ENERGY EFFICIENCY IN BUILDINGS

Project Description

The project aims to strengthen the capacity of civil society organizations (CSOs) to enhance their participation in decision-making to support the development of sustainable housing in three target cities – Astana, Almaty, Petropavlovsk.

The project will build the capacity of local CSOs to critically evaluate the programmes for the refurbishment of multi-family buildings (MFBs) and develop concepts for the implementation of ener-
